

REMARKS

Claims 1- 16 are pending in the application.

Claims 1, 7, 9, 10, 12-14 have been objected to because of various informalities.

Claims 1-16 have been allowed over the prior art of record.

Specification Amendment

Applicants have amended two sections of the specification at page 2, line 26 through page 5, line 10 and at page 15, line 9 through page 16, line 15. These changes were made to bring the acronyms used in the specification in conformity with the acronyms MOS and POS used in the claims. No new matter has been added by these changes.

Claim Objections

The Examiner has objected-to Claims 1, 7, 9, 10, 12-14 because of various informalities.

Applicants have made the Examiner's suggested corrections to claims 1, 7, 10, 12 – 14.

Additionally, claim 13 has also been amended to eliminate the Examiner's identified antecedent problems. Support for this change is shown in Fig. 9 and described in the specification at page 14, lines 18-25.

Additionally, applicant has canceled claim 9.

No new matter has been added by these changes.

Applicants believe that since the various informalities of claims 1, 7, 9, 10, 12-14 have been corrected, the objections to these claims should be removed.

Claims 1 – 16 should now be allowed to issue and the same is respectfully requested.

Applicants have noted the prior art made of record by Examiner.

The Examiner presumption is correct, the subject matter of the various claims was commonly owned at the time any inventions covered by those claims were made.

If Examiner has any questions regarding this response, applicant's attorney would welcome a call from the Examiner to discuss them.

Respectfully,

Christopher. R. Doerr
Christophe J. Dorrer
Peter J. Winzer
